Name : D Teja Sadwika **Roll No :** 2520030536

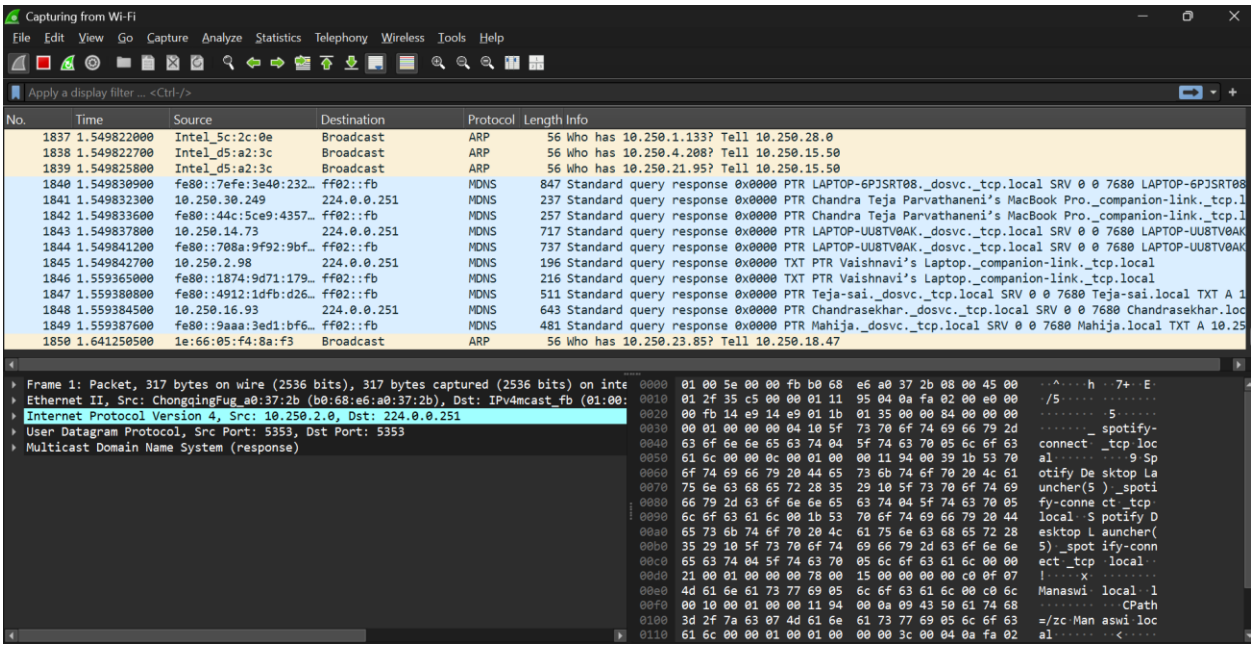

Skill – 1

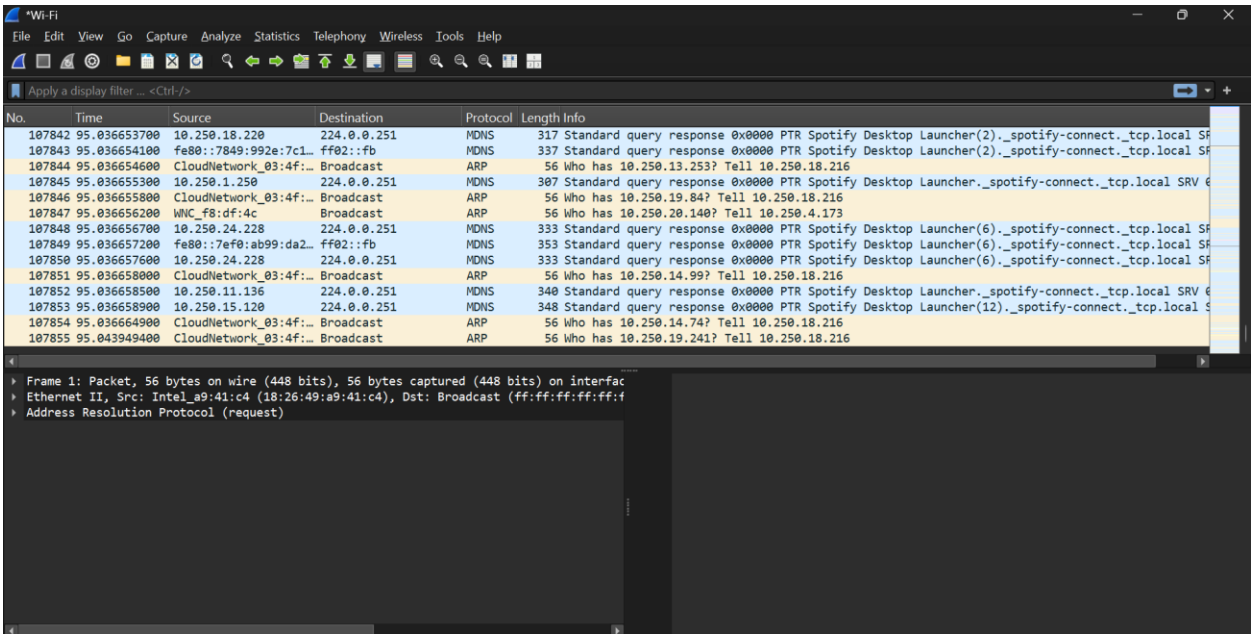

Encapsulation Builder : Analyze the overhead introduced by protocol headers and determine how encapsulation affects network efficiency.

Aim : To capture network packets and understand how Ethernet, IP, and TCP/UDP headers are added during data transmission. Whenever data travels through a computer network, each protocol layer adds its own header to the data. These headers introduce overhead. Using Wireshark, we will capture real network packets, examine Ethernet, IP and TCP/UDP headers, calculate the total overhead, and determine how efficiently the network carries application data.
